Spaces and Bridges

The City begins with the Bridge. Architecture is primarily a question of forming the Space. Our Cities are carefully carved in Space. We aim to create timeless urban Atmospheres.

The lecture will be divided into two parts. It will give an insight into the works of both Ondrej Císlers studios in Prague, academic and professional. A selection of works of the company will serve to illustrate the intellectual background of our common dealings. Architecture as shared knowledge, no primary concern with petrified modernity or tranicency of fashion trends. An attempt to craft, poetry and meaning.

Building 11, Aula III.B
Campus Leonardo

November 19th
Open Lecture - 5:15 pm
