

9:15 - 9:30

Opening

Massimo Bricocoli, Head of DASTU Politecnico di Milano
Bertrando Bonfantini, DASTU Politecnico di Milano

9:30 - 9:45

Reasons of the seminar,
Research and design questions

Giulia Fini, DASTU Politecnico di Milano

9:45 - 10:45

first session

Lyon Part-Dieu, Contemporary Metropolitan Hub:
regeneration strategies and tools
for a complex unitary project

François Decoster, l'AUC, Paris

Collaborative urban transformation -
Learning from Amstel III, Amsterdam
Saskia Beer, Transformcity, Amsterdam

Questions and open discussion

11:00 - 12:00

second session

Wellbeing in the workplace. New interventions
and refurbishment of office blocks in Milan

Michele Rossi, Park Associati, Milan

Coworking spaces in Milan: places for remote
workers during the Covid-19 pandemic?

Ilaria Mariotti, DASTU Politecnico di Milano

Questions and open discussion

12:15 - 1:15

third session

The Luchtsingel regeneration, Rotterdam.
From an abandoned building to an urban hub
Kristian Koreman, ZUS Zones Urbaines Sensibles,
Rotterdam

Brussels European District: a water project
for binding service sector and context

Marco Ranzato, DdA Università di Roma Tre
and Latitude Platform, Bruxelles

Questions and open discussion

1:15 - 2:00

lunch break

2:00 - 3:15

fourth session

Paris La Défense: Le Plan Guide des Espaces Publics
and the Grande Arche Jardins

Alessandra Cianchetta, AWP Ltd Architects,
London and New York

Questions and open discussion

Final roundtable and conclusion

Antonella Bruzzese,
Carolina Pacchi,
Bertrando Bonfantini,
Giulia Fini

DASTU Politecnico di Milano

The seminar represents a moment of discussion and knowledge sharing
about the issue of modification of office districts and service workspaces.

Even before the effects caused by the COVID-19 pandemic,
the request of reconfigurations of office districts and buildings was a tangible
reality in various European contexts, driven by diverse reasons:

the vacancy created by a surplus of realizations by the real estate markets;
the request of better quality and comfort; a multiplicity of services workplaces'
geographies; changes in lifestyle and labour practices. Some of these conditions
have been moreover dramatically affected by the current COVID-19 pandemic.

Considering both realized projects and ongoing researches,
the seminar intends to reflect on strategies, design tools and processes for the
reconfiguration of office districts, with particular attention to urban scale, role,
and issues of urban regeneration: soil design, in-between public space structure,
presence of temporary and mixed activities, flexibility and greenery.
In this framework, complex projects of regeneration are presented in the opening
and final sessions; current trends and projects in Milan are part of
the second session; cutting-edge experiences are illustrated in the third section.
Aim of the seminar is to focus on design trajectories and processes to reimagine
the office-directional workspaces as more able to absorb urban modifications
and practices and to interpret new challenges of sustainability.
