ATTIVITÀ: TITOLO

Developing Innovative Storytelling for Rural Landscape Systems

ATTIVITÀ: DESCRIZIONE / ACTIVITY DESCRIPTION

The activity is part of a research project with the objective of narrating the historical evolution of the Milanese agricultural landscape of the "marcite" water-meadows through the analysis, interpretation, and redrawing of historical maps.

Students are specifically tasked with developing innovative graphic methods for describing the historical and spatial characteristics of rural landscape heritage at different scales, from the territorial to the detail level. The goal is to present these heritage sites in a clear and engaging way to a broad audience. The output will be the production of multi-scale maps that clearly and attractively depict the historical assets under study.

The work is divided into two phases, carried out in parallel:

- A phase of bibliographic research (articles, books, etc.) that explores innovative and "unconventional" methods for representing landscapes and heritage. There are many databases available that can be accessed for free.
- A phase of drawing maps and graphic representations of the sites and hypothesizing the construction of new graphic products that can be developed collaboratively.

Both desk-based activities and on-site surveys and fieldwork are planned.

Learning Objectives and Skills

Students will acquire both technical skills and transferable skills (soft skills):

- Reading and understanding of the landscape heritage.
- Conservation and management of heritage sites.
- Development of critical thinking related to heritage issues.
- Problem-solving and teamwork skills.

POLITECNICO
MILANO 1863

- Development of interpersonal communication, empathy, and organizational and management skills.

LINK FOR APPLYING FOR THE INTERNSHIP: <https://forms.office.com/e/dWMzPKvzCh>

Students are required to upload:

- A short CV
- The list of exams already passed at Politecnico di Milano, with final grades.
- A portfolio of graphic works (only work done independently and not in groups).

<i>LINGUA DI SVOLGIMENTO DELL'ATTIVITÀ</i>	Italiano	X
	Inglese	X

<i>NUMERO DI TIROCINANTI RICHIESTI PER L'ATTIVITÀ:</i>	5 (five)
--	-----------------

<i>DISPONIBILITÀ:</i>	<i>data inizio</i>	June 1, 2025	<i>data fine</i>	October 31, 2025
