

SERVICE ACCESSIBILITY TO MIGRANTS

Within the framework of the easyRights Project (www.easyrights.eu) I propose two thesis works, aiming at investigating:

- 1) The role played by service accessibility within the general goal of immigrants integration
- 2) An evaluation framework of service accessibility

The two thesis students will be involved in the project team and will benefit of project activities, resources and partners' ompetences <https://www.espon.eu/DIGISER>.
