

# Ricostruzione di Montorio al Vomano (TE)

The Workshop activity involves the reconstruction of some parts of the town of Montorio al Vomano, in particular of some buildings destroyed or compromised by the seismic events of 2009 and 2016, which generated several architectural, urban and environmental criticalities. The activity is part of a three-year research agreement between the Municipality of Montorio al Vomano and the Department of Architecture, Construction Engineering and the Built Environment (ABC). The activity includes surveys of the project areas and on-site research.

07–18/02/2022\_Montorio al Vomano (TE)
