Are you interested in how research can generate safe and socially equitable development?

Transport Planning: from Theory to Practice is an intensive two-week transdisciplinary active workshop which will explore the theoretical and practical strategies necessary to operate a transformative research process.

This year, the study group will support the ongoing research in the Corvetto area of Milan. In particular, participants will analyse the spatial distribution of traffic accidents involving marginalised micromobility users in order to understand the socio-economic and demographic settings of accident distribution.

The workshop will address mobility injustice in planning, design, and policy-making, which seek road safety without addressing structural issues.

Participants will engage in action research to uncover local experiences, subsequently producing epistemological sets of knowledge to pass on to the local community as a tool for self-development.

WORK PROGRAM

This is a two-week workshop, requiring daily participation from 9.30am to 6.00 pm.
A detailed program will be provided to selected participants.

HOW TO APPLY

To be selected, send an updated CV and a letter of interest as soon as possible and no later than 20th May, 2024 to workshop@mic-hub.com. Applicants will be notified of the results of the selection process no later than 24th May, 2024.

The workshop will be conducted in English and is available for students of the following courses:

- L21 Urbanistica: Città Ambiente Paesaggio
- LM4 Architettura - Ambiente Costruito - Interni - Architecture - Built Environment - Interiors
- LM4 Architettura e Disegno Urbano - Architecture and Urban Design
- LM4 Sustainable Architecture and Landscape Design - Architettura Sostenibile e Progetto del Paesaggio
- LM48 Urban Planning and Policy Design - Pianificazione Urbana e Politiche Territoriali
