**THE ELEMENTS OF THE CONSTRUCTIVE PHENOMENON**  
A trilogy between architecture, landscape, construction

### TRILOGY

Built architecture represents the physical manifesto of a theory, the constructive barometer of an era, the natural materialization of any design activity. The LECTURES trilogy intends to pay attention to the constructive act as a unique and irreplaceable action of defining architecture, elevating it to a discipline that better than others combines the reasons of form with the exact sciences, the technical approach with the humanistic sphere, the space with the people who live it.
