<i>Laboratorio/Dipartimento</i>	DASTU

ATTIVITA':

Highway to Wilderness: City, Forest, Infrastructure

Once a symbol of changing lifestyle and consumption models associated with mass automobility, Italian rest areas, over the years, have represented an extraordinary catalogue of different design solutions to very basic issues, which today needs to be rethought, in light of a new way of meaning mobility. The internship, linked to the participation in Seoul Biennale 2021, is aimed at investigating some speculative models of redevelopment of this typology, through an idea of transformation that has to be integrated into a process of rehabilitation of the so-called Italian internal territories, and as part of a larger attempt to implement new relations between cities, the countryside, and the wilderness.

The objective of the research is the critical analysis of this typology from a historical point of view, and the subsequent development of design guidelines, which could complement the foreseen exhibition at Seoul Biennale. The expected result is therefore the definition of spatial and temporal map, complemented by in-depth analyses of specific case studies, and that of communication design that can meet the requirements of the exhibition, in an interplay between physical and virtual.

NUMERO DI TIROCINANTI RICHIESTI PER L'ATTIVITA':

4

DISPONIBILITA':

from May 3rd to June 21st

*LIVELLO DEL CORSO DI STUDI
DEL CANDIDATO:*

Master

POLITECNICO
MILANO 1863

<i>CORSO DI STUDI D'INTERESSE:</i>	
Architettura - Ambiente Costruito - Interni (MI) - Architecture - Built Environment - Interiors (MI)	X

<i>LUOGO DI EFFETTUAZIONE</i>	Smart Working
<i>DURATA IN ORE/MESI</i>	150 hours / 1 month 1/2
<i>MODALITA' DI EFFETTUAZIONE</i>	Part Time
<i>COMPETENZE LINGUISTICHE RICHIESTE</i>	Italian and English
<i>COMPETENZE SOFTWARE RICHIESTE</i>	Autocad, Photoshop and Indesign
<i>ALTRE COMPETENZE TECNICHE RICHIESTE</i>
