ATTIVITA':

MIDDLE-CLASS MASS HOUSING IN EUROPE

The research aims to investigate in a transnational, global and comparative perspective the housing stock made of housing complexes and neighbourhoods built for the middle-class in Europe between the 1950s and the 1970s and is framed within the European project “MCMH-EU, “Middle-class Mass Housing in Europe” (www.mcmh.eu). By proposing a multidisciplinary approach that cross diverse research fields (architecture, planning, urban studies, preservation, social sciences, interior design, anthropology...) the project addresses diverse moments of the production of post-war housing complexes and neighbourhoods,, from their planning, design construction to the processes of use and transformation of the residential space, looking at the current strategies and policies for the regeneration of this housing stock.

The aim of the internship will be to investigate this housing heritage with a variety of research methods, practices and instruments, based on the interaction with a wide range of sources and tools., visual and textual

The internship consists in:

- 1) The construction of a repertoire of narratives, memories and diverse representations on selected housing neighbourhoods and complexes, working on diverse media.
- 2) The construction of analyses through the use of diagrams, thematic maps, timelines, graphs aimed at synthetizing the outcome of the research (social survey, interviews, project history).
- 3) Construction of taxonomies and atlas of cases using drawing as a research tool for graphic analysis
- 4) Creation of collections of textual and visual documents on the neighbourhoods.

NUMERO DI TIROCINANTI RICHIESTI PER L'ATTIVITA': 5

DISPONIBILITA':

POLITECNICO
